27

JANUARY - MONDAY

58°C

Temp	Fuel	Distance
40	12	18
45	14	13
50	15	8
55	18	3 ✓
60	20	2 ✓
65	22	7 ✓
70	25	12
75	27	17

} nearest selection table

Given $K = \underline{\underline{3}}$ nearest

$$\frac{18 + 20 + 22}{3} = \frac{60}{3}$$

predicted = 20 L/hr

hence predicted fuel consumption

is 20 L/hr for 58°C
